DETAILED ACTION

Status of Application, Amendment and Claims

Applicants' amendment received on August 23, 2004 has been entered. Claims 35, 67, and 68 have been amended. Claims 35 and 65-68 are currently pending and under consideration.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office Action.

Information Disclosure Statement

The information disclosure statement submitted on August 23, 2004 has been considered by the Examiner and a signed copy is attached to the office action.

Withdrawn Rejections

The rejection of claims 35 and 65-68 under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Neer et al. (U.S. Patent No. 4,698,328, October 1987), as set forth in the previous office action, has been withdrawn in view of a declaration under 37 C.F.R. 1.132 from Dr. Heath providing evidence of unexpected results and Applicants' argument that the patent of Neer et al. does not teach administration of PTH1-34 at the specific dose of 20 ug/day, which reduced the risk of vertebral and non-vertebral bone fracture and side effects.

Claim Rejection Under 35 U. S. C. § 112, 1st paragraph, New Matter

(i). The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

(ii). Claims 67 and 68 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The amended claims 67 and 68 recite vitamin D2 or D3, which introduces new matter. The specification, as originally filed, does not disclose supplemental vitamin D2 or D3. Accordingly, the amended claims introduce new matter.

Conclusion

Claims 35, 65, and 66 are allowed. Claims 67 and 68 are rejected.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1646
